### DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nakanishi(JP5447016) in view of Rabe(4296344).

Nakanishi substantially disclose the claim invention. However, Nakanishi does not disclose the coil wire connected to the second commutator having a smaller diameter than that of the coil wire connected to the first commutator.

Rabe discloses in fig.8 a motor comprising: coil winding, wherein the second coil winding (100) is smaller than the first coil winding for the purpose of decreasing  $I^2R$  losses. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the AC/DC commutator of Nakanishi with the coil structure of Rabe for the purpose of decreasing  $I^2R$  losses.

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.
